

## IT STAFFING SOLUTIONS

Many small to mid-sized businesses cannot maintain a full-time IT staff member, that's where Metro IT Service comes in. We can structure onsite solutions weekly or even monthly to keep your network, workstations, and business running smoothly.

### Hear what others have said about Metro IT Service...

"I appreciate your excellent service both in my office and my home. You scored once again today with your "house call". You make what seems to me very complicated look easy when you do the work. I have referred several people to you."

-Lucas S Van Orden MD, PhD

"Steve is my best resource for solving computer issues. I simply call him and it's fixed. No more computer frustration and hours of wasted time for me!"

-Jennifer Way, Way Solutions

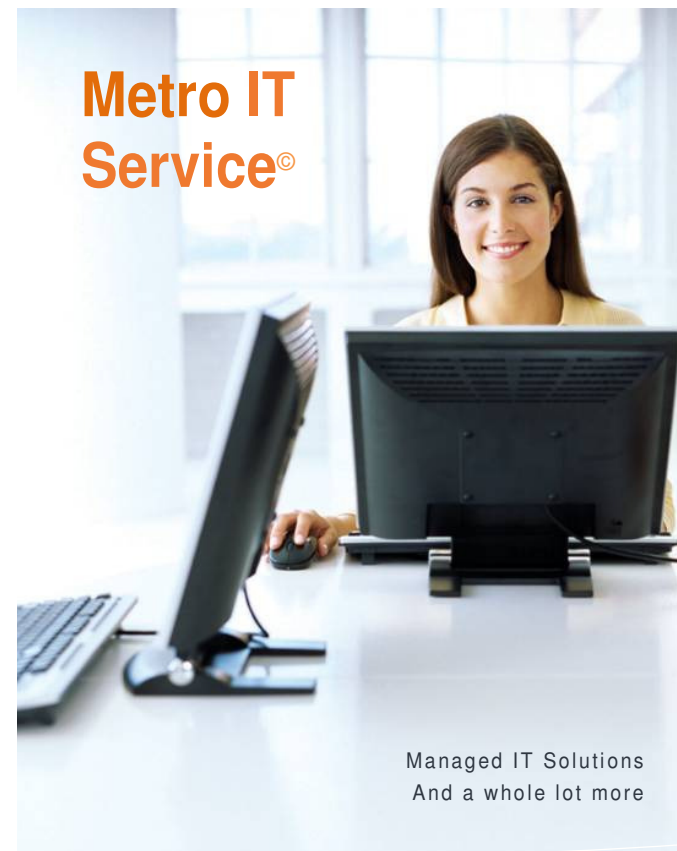

"I first contacted Steve about 2 years ago after a phone book search. This was the first time we needed an IT expert since we moved to Nashville. I have used Steve's services twice since the original visit. He is very knowledgeable and able to rapidly solve all computer problems we have encountered.

I recommend him without reservation."

-Roy G. Larson, MD
